Dump Station Basics - 12 Steps:

- 1) Stage supplies:
 - a) Gloves
 - b) Wipes
 - c) Black tank flush hose
- 2) Once at dump station, put on gloves
- 3) Connect sewer hose to:
 - a) Black tank outlet
 - b) Dump station drain
 - c) Open valve to drain
- 4) While black tank is draining connect black tank flush hose:
 - a) To non-potable hose
Note: Clean with wipe first due to prior use
 - b) RV black tank flush inlet
 - c) Turn water on at station to begin flush
- 5) Once satisfied black tank is fully drained:
 - a) Turn off black tank flush water
 - b) Close black tank drain valve
- 6) Open gray tank valve and drain, if you have dual outlets:
 - a) Disconnect sewer hose from black tank outlet RV side only
 - b) Connect sewer hose to gray tank
- 7) While gray tank is draining:
 - a) Disconnect black tank flush hose
 - b) Put hose away
- 8) Once satisfied gray tank is fully drained:
 - a) Close gray tank valve
 - b) Disconnect sewer hose from RV only
- 9) Spray out sewer hose and connectors and put away
- 10) Carefully remove gloves and dispose in trash with used wipe from Step 4
- 11) Once gloves and wipes are trashed, sanitize hands, ensure everything is put away and leave dump station
- 12) Once away from the dump station:
 - a) Add a few gallons to black tank
 - b) Add tank treatment
Note: We use [Happy Camper Tank Treatment](#)*
